LATENCY: 1.2ms

Sharat Maharjan

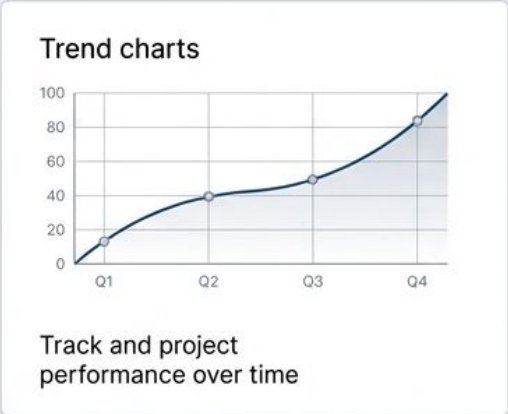

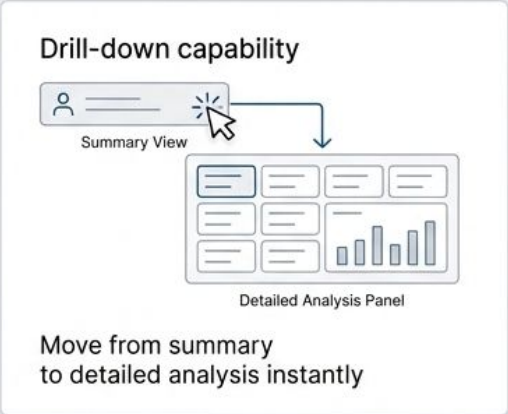

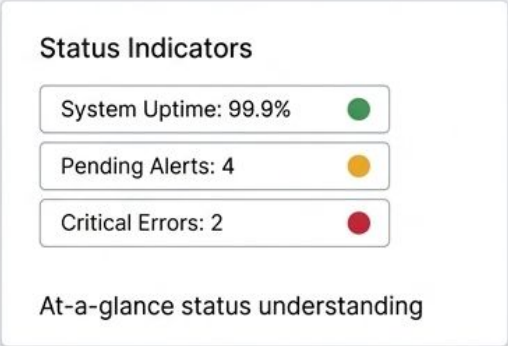

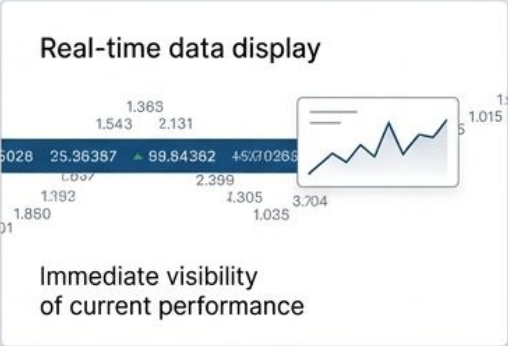

The foundations of system-wide performance monitoring

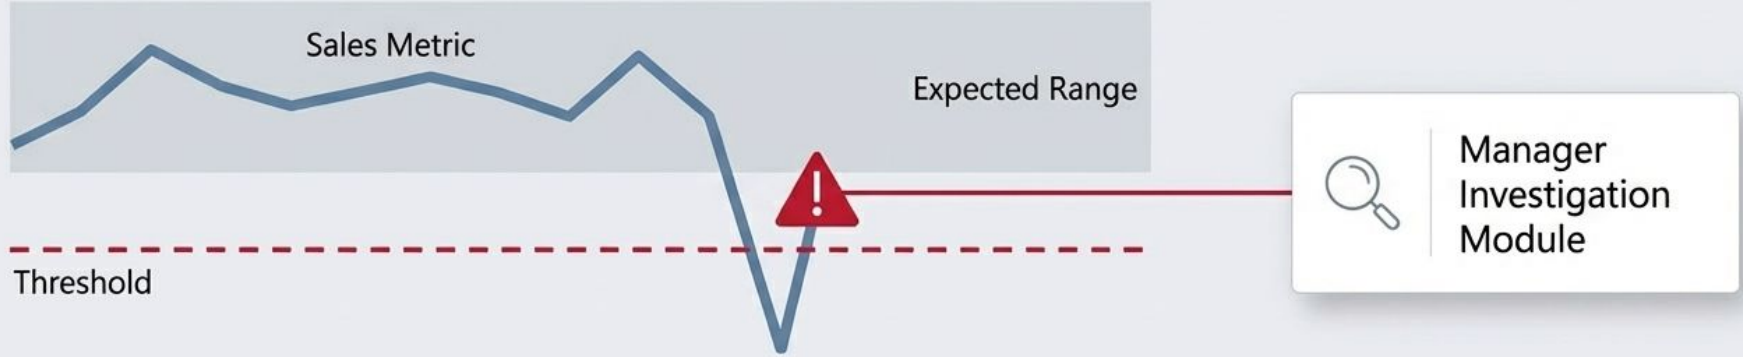

The Key Performance Indicator ecosystem

Translating data into real-time visibility dashboard

Automated exception reporting triggers investigation

The Mechanism

The system automatically flags deviations from targets.

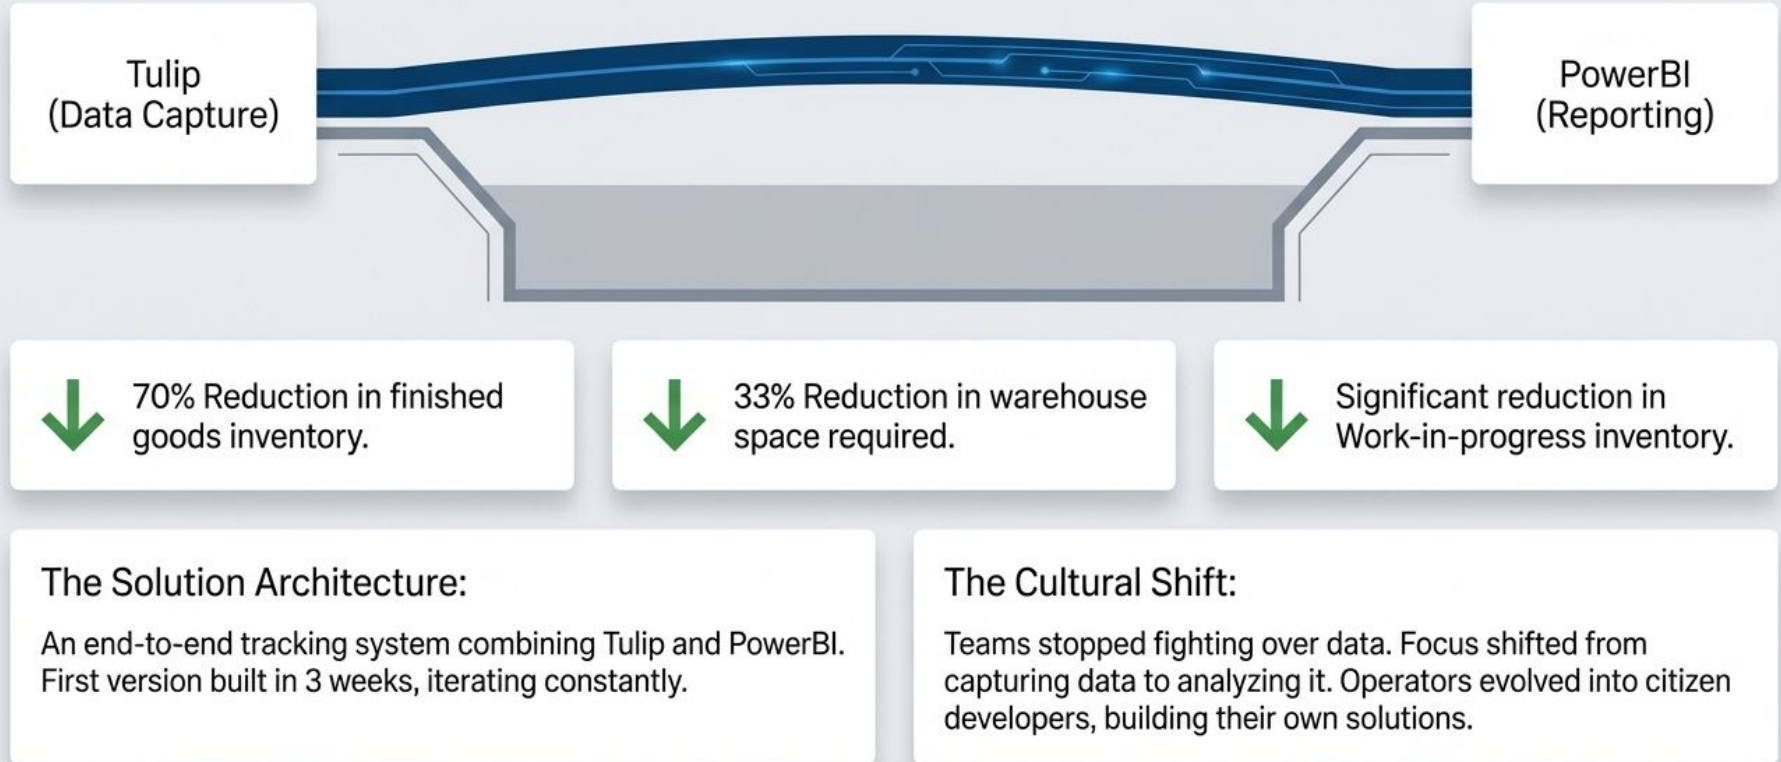

The Action

An alert is generated (e.g., Sales drop below defined threshold).

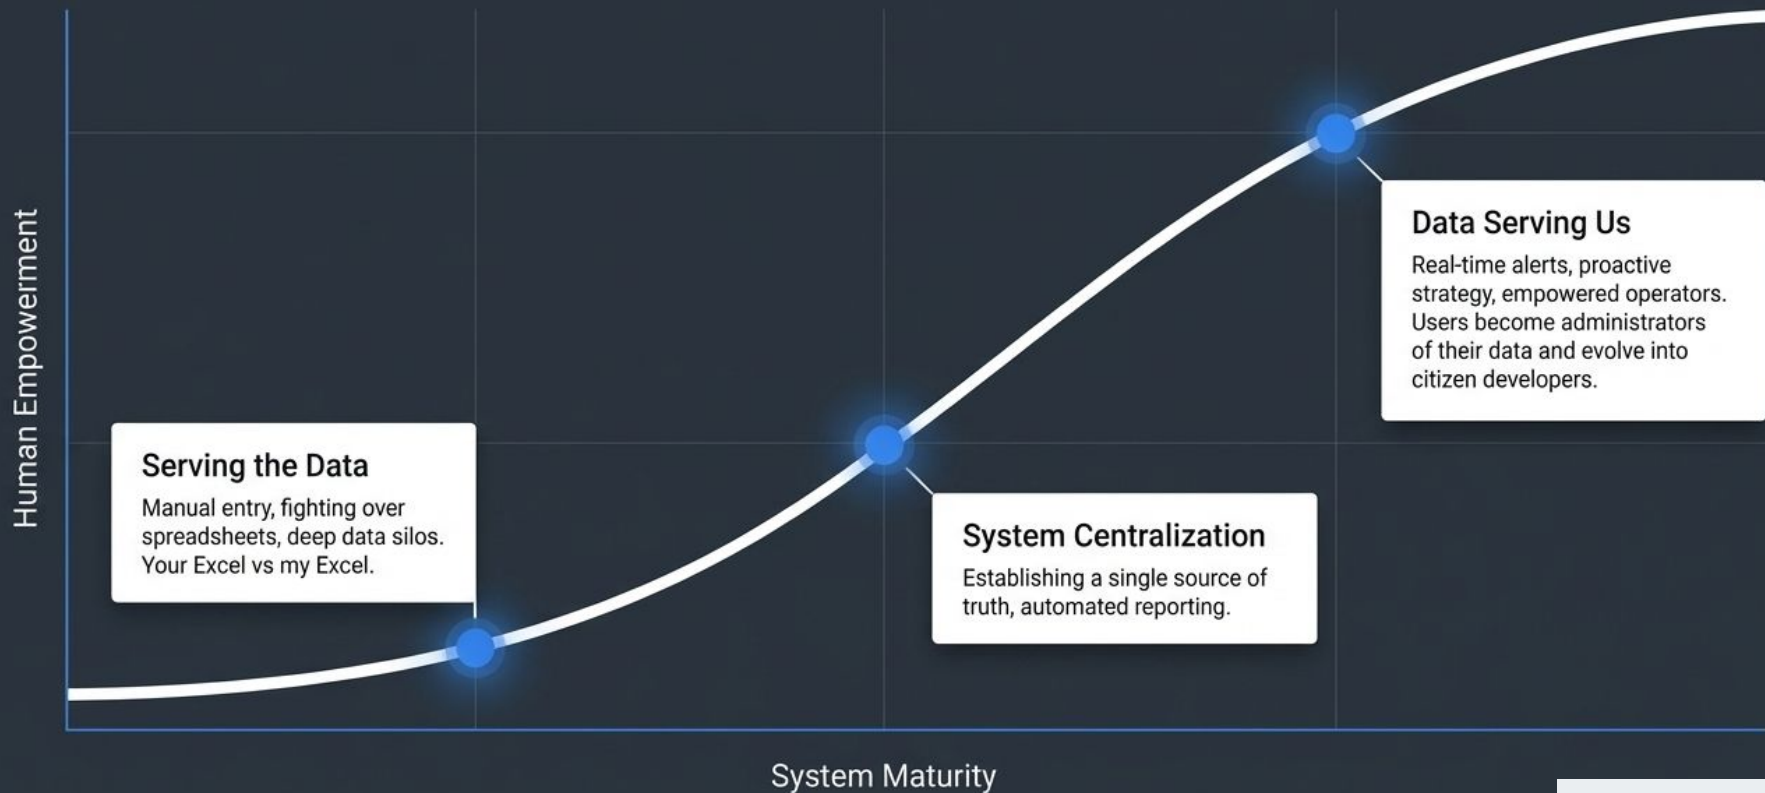

The Result

Managers focus their attention precisely where it is needed without manually hunting through healthy data.

Closing the gap with real-time tracking

The Data Culture Evolution

The operational outcomes of a mature MIS
